Acoustic Panels

BEAUTY MEETS BETTER SOUND

QUIETER SPACES | WARMER INTERIORS | MADE TO LAST

Excellent sound absorption and noise reduction

Creates a quieter, more comfortable space by reducing unwanted noise.

Improves room acoustics and echo control

Minimises echo and reverberation for clearer sound and better acoustics.

Modern decorative wooden finish

Stylish slatted design that enhances any interior space.

Durable and long-lasting material

Made with high-quality MDF and premium felt for lasting performance.

Environmentally friendly and sustainable

Uses responsibly sourced materials for a more sustainable choice.

Moisture resistant for interior use

Designed to withstand indoor humidity, ideal for homes and commercial spaces.

Lightweight and easy to install

Simple DIY installation with minimal tools.

Suitable for residential and commercial interiors

Perfect for living rooms, bedrooms, offices, retail spaces and more.

Scratch and wear resistant surface

Maintains its premium look even with regular use.

Low maintenance and easy cleaning

Quick to clean with a damp cloth, keeps looking great with minimal effort.

Fire-rated felt backing (standard interior use)

Premium felt backing with enhanced safety for interior applications.

Enhances interior aesthetics and warmth

Adds texture, depth and a warm, sophisticated look to any space.

Where design meets function

01 DISTINCTIVE FINISH

Slim linear slats introduce depth and timber-inspired warmth.

02 FELT-BACKED CONSTRUCTION

Felt backing can help reduce reflected sound in a room; acoustic performance depends on the installation and has not been independently verified here.

03 VERSATILE APPLICATIONS

Use on interior feature walls, behind televisions or in workspaces.

04 EVERYDAY MAINTENANCE

Dust gently with a soft dry cloth or brush attachment. Avoid soaking, abrasive cleaners and harsh solvents.

IMPORTANT

For indoor use only. Keep panels away from sustained moisture, direct heat sources and locations requiring a certified fire or acoustic rating unless supporting test documents are provided.

A considered installation

01 PLAN

Measure the wall, determine panel orientation and locate services or wiring before drilling.

02 PREPARE

Ensure the surface is clean, dry, sound and suitable for the selected fixing method.

03 FIX

Use an appropriate fixing system for the substrate and panel weight. Follow the adhesive or fastener manufacturer instructions.

04 FINISH

Cut carefully where required, protect exposed edges and check alignment throughout.

Installation guidance is general only. Verify substrate, adhesive compatibility, panel weight, required clearances and relevant building/fire requirements with a qualified installer before use.
